

# ENGINE COOL-AIDE Ready-To-Use

## RACING ENGINE COOLANT

### DESCRIPTION:

Maxima Engine Cool-Aide is a non-glycol racing engine coolant formulated to prevent corrosion while significantly reducing engine temperatures through greater and more efficient heat transfer. The advanced, glycol-free formulation is 100% biodegradable in its unused form and is approved for all paved and dirt racing surfaces. Cool-Aide was designed from the ground up for race use and does not offer freeze protection.

### FEATURES & BENEFITS:

- Meets racing specifications for all dirt and paved surfaces
- Allows for maximum horsepower by controlling engine temperatures
- Glycol, nitrate, amine and borax free!
- Protects against rust & corrosion
- 100% Biodegradable in its unused form

### APPLICATIONS:

For all liquid-cooled engines. Approved for all paved and dirt surfaces. Does not offer freeze protection. Ready-to-use formulation requires no mixing.

### TECHNICAL DATA

SPECIFICATION	TEST METHOD	RESULTS
APPEARANCE	VISUAL	Pink
DENSITY (g/cm <sup>3</sup> )	D5931	1.0046
FREEZE POINT (°C)	D1177	-0.5 (31.1°F)
BOILING POINT (°C)	D1120	100.6 (213.1°F)
BOILING POINT (°C)	15 psi cap	125.6 (258.1°F)
